Site Location: Triangular median at Vermont Ave and Hollywood Blvd

Carrot Patch Corner: Sculptural Planter Project Prototype

September 25, 2017

Scope of Work:

Artist will fabricate one prototype of a carrot top sculptural planter. Artist imagines for final vision of Carrot Patch Corner that there will be between 14 and 18 Carrot tops varying in three different widths measuring between 30" and 50". Height dimensions will vary. The prototype will be the middle size measuring approximately 40"wide x 40"tall. It will be filled with amended soil and have an approximately 3 foot tall palm planted in the center of the carrot to resemble a green carrot top.

Each carrot is made of 2" cast concrete over reinforced mesh with a rebar ring at base. Each carrot is covered in iridescent orange nova chrome paint.

If more carrots are ordered by the EHBID, Artist recommends that they will be set on a reconfigured soil elevation at the expense of the EHBID that will cover the existing wall at the site location where unauthorized camping exists. This will establish ground that is not level and full of large carrots to make it an undesirable camp spot.

Artist is not a contractor and does not claim to be so. Artist is not liable for any injury or accidents caused by interaction with this sculptural planter.

Timeline:

Prototype will be in place at the site location by 5pm Tuesday October 10th, 2017 for the EHBID board meeting that evening.

Price:

\$950 for prototype which includes carrot planter pot, soil, Pygmy palm tree and delivery to the Vermont triangle

Receipt of the \$950 payment will suffice for acceptance of this contract.

Sincerely,

Christoff Van Kooning
